

# Quality and **Environmental** Management Policy

## Fey Lamellenringe GmbH & Co. KG

**All our corporate activity is founded on our active implementation of high quality environmental protection and occupational health and safety, while observing ethical principles.**

**Hence, the following principles are central to our corporate policy in order to achieve sustained success in the market:**

- The entire company is geared towards the development, manufacture and marketing of products of the highest quality in the laminar sealing rings and laminar retaining rings sector.  
Our aim is to achieve a satisfied and enthusiastic customer base.
- Each individual employee is personally committed to the quality and environmental management standards in place.
- All suppliers and service providers are subject to the related guidelines and conditions set out by Fey Lamellenringe.
- The basis of all our corporate processes is to strive to prevent errors.  
The implicit aim here is to provide “zero-error quality”.

- Using the best technology available while taking cost-effectiveness into account guarantees the capability, safety and environmental compatibility of our production processes.
- Our careful and sparing use of resources, as well as our use of low emission and low waste production techniques, minimises our environmental impact.
- Our “highest quality” concept also incorporates complying with exacting environmental standards as well as meeting high quality standards.  
We regard statutory and official requirements as minimum standards.
- Quality, service, cost, technology, environmental protection and occupational health and safety are continuously improved and developed.
- Potential risk is assessed throughout the company on a regular basis and relevant countermeasures identified as required.
